

Learning Recovery and Extended Learning Plan

| | |
|-------------------|---------------------------------------|
| District Name: | Northside Preparatory Academy |
| District Address: | 4750 Winton Road Cincinnati, OH 45232 |
| District Contact: | Yolanda Clark, Principal |
| District IRN: | 091227 |

Beginning in March 2020, education in the United States, and the world, changed dramatically due to the COVID-19 pandemic. During the remaining months of the 2019-2020 school year, our students worked at home using paper packets carefully curated to meet the remaining standards not covered during classroom instruction. Communication to families and students was constant to ensure not only the continued learning for our students, but also to stay apprised of their well-being and support families.

As the school year ended it was apparent that the crisis would continue, and we needed to think differently about the 2020-2021 school year. As a result of this thoughtful planning, Northside Preparatory Academy offered three learning options for families to choose from that were implemented on the first day of school, regardless of the student's grade level. These three options allowed families to consider their student's health, their comfort with the current COVID-19 status in our community, their ability or interest in facilitating learning at home and many other important factors. Families were asked to make a choice prior to the start of school and continue with that modality until the end of the 1st semester. Our school leadership team had the discretion to accommodate a family's request for an option change at any point. In the event health conditions at the school change, or the Governor enacts a closure order, all students were able to pivot to Option 3 immediately.

Option 1: Full time in school

Students come to the school building each day for a full instructional day based on the Board approved calendar. Teachers facilitate standards-based instruction using materials that are aligned with the Ohio standards for content and rigor. Specials and other regularly scheduled academic experiences will occur in the building on these days. Based on the grade level of the student, their academic needs and the teacher's discretion, additional work may be sent home for additional practice or enrichment. Students with Special Education needs will receive these services as specified in their IEP during their time in the school building. Regular communication will occur with the family regarding the child's academic progress and their social emotional well-being. Communications may occur through phone calls, text messages, video conferencing or other means dependent on health and safety considerations. Extensive health protocols ensuring the safety of students and staff are followed daily and monitored by the Regional Vice President.

Option 2: Hybrid

Students come to the school building on two specified days per week. Teachers facilitate standards-based instruction using materials that are aligned with the Ohio standards for content and rigor. Specials and other regularly scheduled academic experiences will occur in the building on these days. Based on the grade level of the student, their academic needs and the teacher's discretion, additional work may be sent home for additional practice or enrichment. Students with Special Education needs will receive these services as

specified in their IEP during their time in the school building. Regular communication will occur with the family regarding the child's academic progress and their social emotional well-being. Communications may occur through phone calls, text messages, video conferencing or other means dependent on health and safety considerations. Extensive health protocols ensuring the safety of students and staff are followed daily and monitored by the Regional Vice President.

Option 3: Full time at home

Students learn from home every day school is in session as delineated in the school's Board approved calendar. Students were provided a Chromebook and internet reimbursement if needed based on participation and eligibility guideline. Teachers facilitate standards-based instruction using the ACCEL curriculum which is aligned to Ohio standards for content and rigor. Teachers can modify the activities within each lesson to provide additional practice opportunities, an alternative approach, or add opportunities to engage with tools such as iXL, iReady or other programs to differentiate for student learning needs around a given standard. Teachers also use the assessments within the virtual curriculum, or they can add their own formative and summative measures. Opportunities to engage in special subjects such as Art or PE, as defined by the school's instructional schedule, are also offered to virtual students. Each day instruction is a mix of teacher-led, synchronous sessions and student-led practice activities. Expectations were set for the number of hours students should be expected to engage in learning, and how the family should be prepared to support their child's learning at home. There is a mix of online learning that requires a computer and other offline activities that require solving math problems, collaborating with peers, exercising, etc. Students with Special Education needs will receive these services as specified in their IEP virtually within Canvas, our learning management platform. The Big Blue Button feature inside our closed Canvas platform is HIPPA and FERPA compliant, thus providing a safe environment for our specialists to work directly with students on their caseload to provide the necessary services. Regular communication occurs with the family regarding the child's academic progress and their social emotional well-being. Communications may occur through the Canvas platform, phone calls, text messages, video conferencing or other means.

While other schools predetermined the learning scenario for their students, we were prepared to meet the complexities of giving families choice. Organization, communication, and coordination were paramount to our student's success. As such, we decided that all students, regardless of their modality, would receive standards-based instruction in a defined sequence for each course. This allowed all students in the same grade or course within the school to receive instruction around the same sequence of standards, for approximately the same amount of time, dependent on student need. This coordination allowed for the seamless integration for a student who needs to change from one modality to another due to extenuating circumstances. It also allowed regular assessment data in all three modalities to be used to assess students for supports throughout the RtI process.

While maximizing educational options for families, the school minimized risk of exposure to COVID-19 by aligning with the guidance provided by National, State, and local health officials. Mitigation efforts included facial coverings, health monitoring, cleaning, and sanitizing measures, limiting guests, and implementing social distancing and one-way foot traffic. Careful consideration was given to the emotional well-being of students as we worked to provide an equitable and safe learning environment for all students, regardless of their modality.

Identifying and Meeting Students' Academic Needs

| | |
|--|---|
| Identifying Impacted Students | <p>Spring 2021 For the 2020-2021 school year, we utilized the i-Ready comprehensive assessment system for our students in grades K-8. This online assessment, given in the fall, winter and spring to all students, regardless of their modality, allows us to measure the academic growth of our students in both mathematics and reading. Reports within the system allow us to see which students are on track for meeting grade level goals, which ones are exceeding the expected pace for growth and which ones are not meeting the growth targets. This crucial information forms the basis for the supports we provide students.</p> <p>We also utilized the following tools and resources to identify impacted students:</p> <ul style="list-style-type: none"> ● Heggerty's screeners ● Running records ● Short cycle assessments ● Mock assessments ● Third Grade Reading Guarantee data ● Rtl process ● First and second semester report card conferences ● Interim and report card grades ● Daily school attendance ● Evaluation Team Reports |
| | <p>Summer 2021 During the summer we will use the following assessments to identify</p> <ul style="list-style-type: none"> ● I-Ready assessments ● Heggerty's screeners |
| | <p>2021-2022 We will continue to use the i-Ready comprehensive assessment system for our students in grades K-12. For students enrolled at the school last year, we will have two years' worth of data to continue to identify students' learning needs and put structures and programs in place to support those academic needs. We will also be able to evaluate the effectiveness of our initial approaches and adjust as needed.</p> <p>Explain how you will continue to use the other assessments/data points explained in the Spring 2021 box during the 2021-2022 school year. Teachers will continue to use student progress monitoring data with the same programs available in the Spring 2021 during 2021-2022. This practice has shown students learn more, take ownership of meeting goals and teachers' decision making improves so that instructional strategies are targeted to meet the needs of students. Assessment data will be collected regularly as appropriate by the program or provider to monitor the process.</p> |
| | <p>2022-2023 Explain how you will continue to use the other assessments/data points explained in the Spring 2021 box during the 2022-2023 school year. Teachers will continue to use student progress monitoring data with the same programs available in the 2020-20 school year²¹ during 2022-2023 school year. This practice has shown students learn more, take ownership of meeting goals and teachers' decision making improves so that instructional strategies are targeted to meet the needs of students. Assessment data will be collected regularly as appropriate by the program or provider to monitor progress.</p> |
| Approaches to Support Impacted Students | <p>Spring 2021 Northside Preparatory Academy is using the following approaches to support impacted students during the Spring 2021:</p> <ul style="list-style-type: none"> ● Rtl ● Small Group Instruction ● Direct Instruction |
